

# TABLE OF CONTENTS

<b>LIST OF PAPERS</b> .....	<b>3</b>
<b>ACKNOWLEDGEMENTS</b> .....	<b>4</b>
<b>ABSTRACT</b> .....	<b>7</b>
<b>DANSK RESUMÉ</b> .....	<b>9</b>
<b>INTRODUCTION</b> .....	<b>11</b>
Regulation of blood flow to skeletal muscles during exercise .....	11
NO.....	15
ATP.....	15
Impaired regulation of skeletal muscle blood flow during exercise with aging .....	16
Functional sympatholysis .....	18
Adaptations to exercise training in aging individuals.....	19
<b>OBJECTIVES</b> .....	<b>21</b>
Specific aims and hypothesis:.....	21
<b>METHODS</b> .....	<b>23</b>
Subjects.....	23
Experimental setup.....	23
Training intervention (III and IV) .....	23
Measurements.....	24
Femoral arterial blood flow.....	24
Drug infusions.....	24
Intravascular microdialysis (II and unpublished).....	25
Muscle biopsies (III).....	26
Analysis .....	26
Peak pulmonary oxygen uptake .....	26
One-leg knee-extensor exercise test.....	26
Body composition.....	27
Blood – gases, hemoglobin, lactate and pressure.....	27
Western blot (III) .....	27
Analysis of microdialysate (II and unpublished).....	28
Norepinephrine (II and IV).....	29
ATP release from isolated erythrocytes (unpublished).....	29

<b>PAPER SUMMARIES .....</b>	<b>30</b>
<b>DISCUSSION .....</b>	<b>31</b>
Acute potentiation of cGMP signaling during skeletal muscle contraction in young and older subjects.....	31
Acute potentiation of cGMP signaling increases blood flow and oxidative metabolism in older subjects.....	32
Acute potentiation of cGMP signaling does not improve functional sympatholysis in older subjects.....	34
Effects of exercise training on blood flow and oxidative metabolism .....	35
Effects of cGMP potentiation and exercise training on venous plasma [ATP] (data not included in the manuscripts for this thesis).....	38
Effects of exercise training on functional sympatholysis .....	40
<b>METHODOLOGICAL CONSIDERATION .....</b>	<b>42</b>
Inclusion criteria of the subjects and efficacy of the training intervention .....	42
Measurements of molecular markers in the NO/cGMP pathway .....	43
Measurements of ATP release from isolated erythrocytes .....	43
<b>CONCLUSION AND PERSPECTIVES .....</b>	<b>45</b>
<b>REFERENCE LIST .....</b>	<b>47</b>
<b>PAPERS I-IV</b>
