
TABLE OF CONTENT

PREFACE	IV
PAPERS	VI
SUMMARY	VIII
SAMMENDRAG (DANSK)	X
ABBREVIATIONS	XII
TABLE OF CONTENT	1
1. INTRODUCTION	3
2. BACKGROUND	5
2.1. Carotenoid synthesis and chemistry	5
2.2. Carotenoids in food	5
2.2.1. Carotenoid content of green leafy vegetables	5
2.2.2. Pre- and post-harvest factors influencing carotenoid content in green leafy vegetables.	6
2.3. Average daily intake in Europe	7
2.4. Carotenoid absorption, metabolism and distribution in humans	9
2.4.1. Carotenoid bio-accessibility and bioavailability	10
2.4.2. Effectors of bio-accessibility and bioavailability	11
2.5. Human health effects	13
2.5.1. Lutein in eye health	14
2.5.2. β -Car as pro-vitamin A	16
2.6. High risk individuals for carotenoid malabsorption	16
2.6.1. Short bowel patients: post-operative carotenoid malabsorption and vision related complications.....	17
2.6.2. Bariatric surgery: post-operative carotenoid malabsorption and vision related complications.....	18
2.7. Research methodologies	19
2.7.1. Detection and quantification of carotenoids in food and human samples.....	19
2.7.2. <i>In vitro</i> digestion for investigating liberation and in vitro accessibility of carotenoids from green leafy vegetables.....	20

2.7.3.	<i>In vivo</i> studies investigating bioavailability of carotenoids from green leafy vegetables	21
3.	RESEARCH AIM AND QUESTIONS	25
4.	RESEARCH STRATEGY	27
5.	OVERVIEW OF PAPERS.....	29
6.	PAPER I	31
7.	PAPER II.....	51
8.	PAPER III.....	57
9.	PAPER IV.....	81
10.	DISCUSSION.....	101
10.1.	UHPLC-DAD method	101
10.2.	Liberation and <i>in vitro</i> accessibility of carotenoids from green leafy matrices.....	102
10.2.1.	Green leafy vegetables as a source of carotenoids	102
10.2.2.	Influential parameters for liberation and <i>in vitro</i> accessibility of carotenoids from green leafy vegetables following <i>in vitro</i> digestion	103
10.2.3.	Methodological considerations	105
10.2.4.	Statistical considerations.....	107
10.3.	<i>In vitro</i> accessibility as a potential predictor of the bioavailability in healthy subjects and short bowel patients	108
10.3.1.	Design and method for the “Popeye study”	108
10.3.2.	Carotenoid bioavailability in healthy subjects	108
10.3.3.	Carotenoid bioavailability in short bowel patients.....	109
10.3.4.	Comparison of <i>in vitro-in vivo</i> results.....	109
10.3.5.	Methodological considerations	111
11.	CONCLUSIONS AND PERSPECTIVES	113
12.	ACKNOWLEDGEMENTS	117
13.	REFERENCES.....	119
