Sammendrag (Danish Summary) xiii
1 Introduction 1
1.1 Objective of PhD research 3
2 Background 4
2.1 Malnutrition and micronutrient deficiency 4
2.2 Micronutrient deficiency in school children 4
2.2.1 Impact and prevalence 4
2.2.2 Intervention of micronutrients in school children 8
2.3 Soil transmitted helminth in school children 9
2.3.1 Characteristics 9
2.3.2 Epidemiology and impact of soil-transmitted helminth 10
2.3.3 Treatment for soil-transmitted helminth infection 11
2.3.4 Prevalence of soil transmitted helminth infection in Cambodian school children 11
2.4 WPF school meal program 12
2.5 Rice fortification 13
2.5.1 Rice fortification for micronutrient deficiency 13
2.5.2 Avalable technologies for rice fortification 14
3 Methodology 16
3.1 Study setting 17
3.2 Study design 18
3.3 Participants and recruitment 19
3.4 Sample size 20
3.5 Intervention food and preparation 20
3.7.1 Intervention food 20
3.7.2 Food preparation 22
3.6 Randomization and blinding 22
3.7 Data collection 23
3.7.1 Data collection procedure for in-depth study 24
3.7.2 Anthropometric measurement 25
3.7.3 Cognitive performance tests 25
3.7.4 Blood and urine sample 26

3.7.5 Hemoglobin concentration 26
3.7.6 Soil-transmitted helminth infection 27
3.7.7 Socio-economic survey 27
3.7.8 School attendance monitoring and absence follow up 27
3.8 Ethical considerations 27
3.9 Data monitoring board 28
3.10 Funding and Collaboration 29
4 Results 31
4.1 Paper I 33
4.2 Paper II 45
4.3 Paper III 55
5 General discussion and perspectives 81
5.1 Summary of main findings 81
5.1.1 Summary of findings of paper I 81
5.1.2 Summary of findings of paper II 81
5.1.3 Summary of findings of paper III 82
5.2 Fortification technologies and nutrients for Cambodian fortified rice 82
5.3 Soil-transmitted helminth infection was associated with micronutrient status and cognitive performance 85
5.3.1 Soil-transmitted infection in association with micronutrient status and anemia 85
5.3.2 Soil-transmitted infection affected cognitive performance 86
5.4 Impact of multi-micronutrient fortified rice on micronutrient status 87
5.5 Multi-micronutrient fortified rice could be an intervention strategy for Cambodia 89
5.6 Strength and limitation 92
5.6.1 Strengths 92
5.6.2 Limitations 92
5.7 Implication for practice 93
5.8 Implication for future research 95
6 Conclusion 96
References 97
Appendices 111
Appendix 1: Morbidity data collection form 113
Appendix 2: Questionnaires of socio-economic survey 113
Appendix 3: Information sheet and consent forms 123
Appendix 4: Letter of ethical approval 140
