

TABLE OF CONTENTS

<i>Preface and Acknowledgement</i>	<i>i</i>
<i>Summary</i>	<i>ii</i>
<i>List of publications</i>	<i>iv</i>
<i>Supplemental Material</i>	<i>iv</i>
<i>List of Abbreviations</i>	<i>v</i>
<i>List of Figures</i>	<i>vi</i>
<i>List of Tables</i>	<i>vi</i>
1 Introduction	1
1.1 Background	1
1.2 Focus and aim of the thesis	2
1.3 Thesis outline	2
2 Apple and apple products	4
2.1 Composition of an apple	4
2.2 Processed apple products	6
2.3 Fibre and polyphenols metabolism	6
3 Metabolomics pipeline	8
3.1 Study design	8
3.2 Biological samples	9
3.3 Sample preparation	11
3.4 Analytical platforms: UPLC-QTOF-MS	11
3.5 Data acquisition: pre-processing	15
3.6 Data pre-treatment	16
3.6.1 Normalisation	16
3.6.2 Centering and scaling	17
3.7 Data Analysis	18
3.7.1 ANOVA-Simultaneous component analysis (ASCA)	18
3.7.2 Principal component analysis (PCA)	20
3.7.3 Partial least squares (PLS)	21
3.7.4 Extended Canonical Variates Analysis (ECVA)	26
3.8 Identification	27
3.9 Biological interpretation	29
4 Results and discussion	30
4.1 Methodological consideration	31
4.1.1 Study design	31
4.1.2 Consideration with regards to data analysis strategy	32
4.1.3 Consideration with regards to the selected markers	32
4.2 Evaluation of effects of apple and apple products intake	35
4.2.1 Effect of apple on the gut microbiota	35
4.2.2 Effect of apple on the branched-chain amino acids (BCAAs)	37
4.2.3 Effect of apple intake on acyl-carnitine metabolism	39
4.2.4 Effect of apple on bile acids and steroids metabolism	41

4.2.5 Effect of apple on plasma phospholipids	45
4.3 "Will the doctor be earning his bread"?	46
5 Conclusion	47
6 Perspectives	48
<i>References</i>	<i>49</i>

PAPER I, II and III

SUPPLEMENTAL MATERIAL
