
Preface	iv
List of papers	v
List of acronyms	vi
English summary	viii
Sammendrag (Danish summary)	x
1. Introduction	1
2. Objective of the PhD-study	5
3. Background	6
3.1. Severe acute malnutrition	6
3.1.1. Major pathophysiologic changes	7
3.1.2. Standard of care	9
3.2. Deuterium dilution method	12
3.3. Bioimpedance method	14
3.3.1. Tissue dielectric properties and bioimpedance	14
3.3.2. Measurement and data interpretation	17
4. Methodology	23
4.1. Study setting	23
4.2. Study population	23
4.3. Study design and sample size	24
4.4. Data collection	24
4.5. Statistical analysis	27
4.6. Ethical considerations	28

5. Predictors of nutritional oedema in malnourished children (Paper I)	29
6. Bioimpedance index for measurement of body water in malnutrition (Paper II)	39
7. Bioimpedance for assessing hydration during nutritional treatment (Paper III)	56
8. General discussion and perspective	81
8.1. Main findings	81
8.2. Strengths and limitations	89
8.3. Practical implication	91
8.4. Future research	92
9. Conclusion	93
10. References	94
