

## Table of content

|  |           |
|--|-----------|
| <b>INTRODUCTION .....</b>  | <b>18</b> |
| Chronic kidney disease .....   | 18        |
| Pathophysiology of chronic kidney disease.....                       | 18        |
| <b>CARDIOVASCULAR DISEASE IN CHRONIC KIDNEY DISEASE.....</b>         | <b>20</b> |
| Epidemiology.....  | 20        |
| Arteriosclerosis and Atherosclerosis .....                           | 20        |
| <b>RISK FACTORS FOR CARDIOVASCULAR DISEASE.....</b>                  | <b>21</b> |
| Traditional cardiovascular risk factors in CKD .....                 | 22        |
| Non-traditional cardiovascular risk factors in CKD .....             | 23        |
| <b>CHRONIC KIDNEY DISEASE AND MINERAL BONE DISEASE.....</b>          | <b>24</b> |
| Phosphorus homeostasis in health.....                                | 24        |
| Parathyroid hormone .....  | 25        |
| Vitamin D .....  | 25        |
| Fibroblast growth factor 23 .....                                    | 26        |
| Fibroblast growth factor 23 and fractional phosphorus excretion..... | 27        |
| Chronic Kidney Disease and hyperphosphatemia .....                   | 27        |
| Chronic Kidney Disease and Fibroblast growth factor 23 .....         | 28        |
| <b>DIETARY PHOSPHORUS EXPOSURE AND ABSORPTION .....</b>              | <b>30</b> |
| <b>PHOSPHORUS REDUCING STRATEGIES .....</b>                          | <b>31</b> |
| Optimal Phosphate target levels.....                                 | 31        |

|  |           |
|--|-----------|
| Dietary recommendations in CKD .....                     | 32        |
| Dietary restrictions .....                               | 32        |
| Pharmacological strategies.....                          | 32        |
| <b>CHRONIC KIDNEY DISEASE AND DIETARY APPROACH.....</b>  | <b>34</b> |
| Whole foods principles versus single-nutrient focus..... | 34        |
| Modification Diet in Renal Disease .....                 | 35        |
| Mediterranean diet .....                                 | 35        |
| Dietary Approaches to Stop Hypertension .....            | 35        |
| New Nordic Diet.....                                     | 36        |
| <b>MATERIALS AND METHODS .....</b>                       | <b>38</b> |
| Methods for determining phosphorus intake .....          | 38        |
| Dietary assessment.....                                  | 38        |
| Food tables.....   | 38        |
| Inductively coupled plasma mass spectrometry .....       | 39        |
| Urine collections to validate phosphorus intake .....    | 39        |
| 24-h urinary phosphorus excretion .....                  | 39        |
| 24-h urinary fractional excretion of phosphorus .....    | 40        |
| Plasma concentrations of phosphate and FGF23 .....       | 40        |
| FGF23 assay .....  | 41        |
| <b>THE CLINICAL STUDIES .....</b>                        | <b>41</b> |
| Study I.....   | 41        |
| Study II.....  | 42        |
| Study III .....  | 43        |
| <b>STATISTICS.....</b>                                   | <b>48</b> |
| <b>SUMMARY OF RESULTS.....</b>                           | <b>50</b> |
| Study I.....   | 50        |
| Study II.....  | 52        |

|   |           |
|---|-----------|
| Study III .....                               | 55        |
| .....   | 59        |
| <b>DISCUSSION .....</b>                       | <b>63</b> |
| Study I.....                                  | 63        |
| Study II.....                                 | 64        |
| Study III .....                               | 66        |
| Strengths and Limitations.....                | 70        |
| <b>CONCLUSION.....</b>                        | <b>70</b> |
| <b>PERSPECTIVES AND FUTURE RESEARCH .....</b> | <b>71</b> |
| <b>REFERENCES .....</b>                       | <b>72</b> |
| <b>SUPPLEMENTAL MATERIAL .....</b>            | <b>91</b> |
