PREFACE 3

ABBREVIATIONS 6

LIST OF PAPERS..... 7

INTRODUCTION 8

BACKGROUND10

Prevalence of childhood and maternal obesity in Denmark10

Early nutritional programming and origin of obesity10

Birth weight, modifiable maternal factors and risk of disease13

Assessment of body composition in newborn infants16

Hormones affecting growth.....17

Breastfeeding and obesity17

OBJECTIVES.....21

METHODS22

RESULTS.....29

DISCUSSION31

Main findings in comparison to other studies31

Maternal obesity, GWG and offspring risk of disease33

Maternal gastric bypass surgery and effect on offspring34

Birth weight z-score and body composition35

Post-natal nutrition, growth and obesity.....35

Breastfeeding, growth and offspring subsequent health36

Methodological considerations37

Methods used for assessment of body composition39

Future perspectives40

CONCLUSION43

ENGLISH SUMMARY44

DANISH SUMMARY.....46
