## My short presentation

Mahsa Jalili is a dedicated researcher in nutrition sciences with the University of Copenhagen. With a strong background in molecular biology and clinical investigation techniques, Mahsa has made significant contributions to the fields of clinical nutrition, immunology, and nutritional biochemistry. Her work spans a range of disciplines, reflecting her diverse expertise and commitment to advancing our understanding of various biological processes in nutrition. Through her extensive research endeavors, Mahsa has developed a profound interest in areas such as nutrition, pathophysiology, immunology, and metabolism.
